What Is IV Nutritional Therapy?

IV nutritional therapy is a type of therapy commonly used for its wide range of health benefits, which can include anti-aging, improving immune systems, minimizing anxiety, reversing symptoms of hangovers and more. There are many individuals who aren't getting the essential nutrients our bodies need to perform optimally.

Because IV treatment is administered directly into the veins, the absorption of these nutrients is much greater than with oral intake. Providers believe IV nutrient therapy can be safe, effective and restorative. It is also customized to suit the unique needs of each patient.

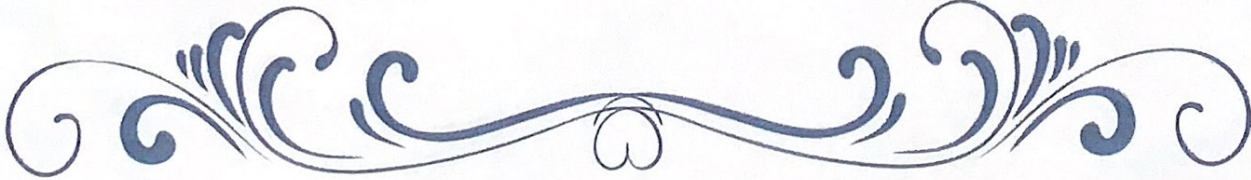

So What is in the Infusion?

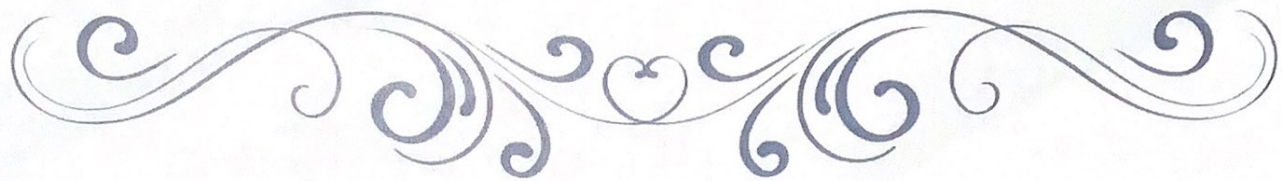

The IV kits include multiple options to suite your specific needs. The fluids provided are either Normal Saline (for extracellular hydration) or Normosol (for intracellular hydration). Premium-quality compounds are then added. Most include a combination of multivitamin mix (Vita Complex), an Amino Acid Blend, or a Mineral Blend with additives to meet your needs.

Ingredients in Vita Complex include vitamins B1, B2, B3, B5, B6 and ascorbic acid.

Ingredients in Amino Acid Blend include arginine, ornithine, lysin, and citrulline.

Ingredients in Mineral Blend include magnesium, manganese, and cooper.

IV Solutions

Hometown Healthcare LLC

Recovery & Performance

Designed to help shorten the time of recovery after an injury and potentially improve athletic ability. This includes premium-quality compounds that can help promote improved performance and overall wellness.

- ❖ Replenishes essential nutrients
- ❖ Reduces inflammation

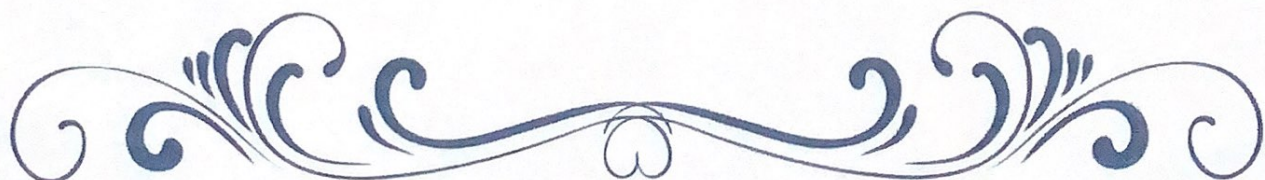

Ingredients include Vita Complex, Amino Blend, Mineral Blend with added ascorbid acid.

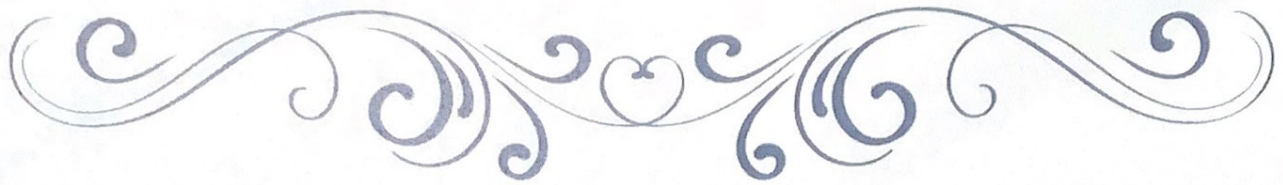

Get-Up-and-Go

Designed to help kick start your metabolism and feel more energized, this IV includes premium-quality compounds believed to help burn fat, boost metabolism and provide the nutrients needed for optimal wellness.

- ❖ Restores energy
- ❖ Improves performance

Ingredients include Vita Complex and Amino Acid Blend.
